Gen Engelman M.D.

3003 Locust St. St Louis Mo.

Dr Sir: Please don't think  
I have forgotten your request I  
have gathered over a pile of the  
acorns & with the result of  
only 4 good ones. I begin to  
suspect that we have only  
found what the Squirrels  
rejected - however I will send  
you a little parcel of them with  
the leaves so you will be sure  
of the kinds selected - unfortunately  
I am not sure of the leaf you  
showed me & I find three kinds with  
long middle points - if none of these  
do not prove to be what you want  
will try again next year for you.

(D. V.).

Very sincerely

R.O. Sweeney.

I cannot explain why Wislizenus  
should use the common phrase "Alkali  
water" except from its universal use  
in the northern part of the State & we  
out of that region - suppose it to be such  
as I had not read the report did  
not notice the analysis. Thank you  
for pointing it out to me -
